

District and Diversity and Inclusion Teams

They work with new and arriving communities and ones that are not geographically based, such as Afro-Caribbean and central and eastern European communities, gypsies and travellers, women's and disability groups.

The team work with individuals and groups to build skills and confidence which will enable them to participate in decision making. They make sure that these communities have fair access to public services. The team provides information and advice which enables them to contribute positively with all residents in their neighbourhood.
