

## **An Introduction to Neighbourhood Support Services**

Neighbourhood Services targets funding and helps to support residents to deal with specific needs and interests at a very local level.

Working with us gives you an opportunity to influence services that directly affect the quality of life for you, your family and those who live around you. You can influence decisions that will contribute towards making your neighbourhood a safer place to live.

### **Traffic Calming in Burley**

Working with you and other partners, such as the police and Primary Care Trusts, we have helped to create new community centres and turn run-down sites into play areas and community gardens.

We have re-established community events and developed specific initiatives to reduce crime at a local level.

### **A funded Play Area**
